✔ The World Wide Web Consortium                                                 Your answer

Google

Mozilla

Microsoft

---

## Question 3:

Choose the correct HTML element for the largest heading:

✔ <h1>                                                                          Your answer

<heading>

<head>

<h6>

---

## Question 4:

What is the correct HTML element for inserting a line break?

✔ <br>                                                                          Your answer

## Question 5:

What is the correct HTML for adding a background color?

✔ &lt;body style="background-color:yellow;"&gt;                                    Your answer

## Question 6:

Choose the correct HTML element to define important text

✔ `<strong>`                                                                                    Your answer

   `<important>`

   `<b>`

   `<i>`

## Question 7:

Choose the correct HTML element to define emphasized text

✔ `<em>`                                                                                         Your answer

   `<italic>`

   `<i>`

## Question 8:

What is the correct HTML for creating a hyperlink?

✔ `<a href="http://www.w3schools.com">W3Schools</a>`                                              Your answer

   `<a url="http://www.w3schools.com">W3Schools.com</a>`

   `<a>http://www.w3schools.com</a>`

   `<a name="http://www.w3schools.com">W3Schools.com</a>`

## Question 9:

Which character is used to indicate an end tag?

✔ `/`                                                                                            Your answer

   `<`

   `^`

   `*`

## Question 10:

How can you open a link in a new tab/browser window?

✔ `<a href="url" target="_blank">`                                                               Your answer

   `<a href="url" target="new">`

   `<a href="url" new>`

## Question 11:

Which of these elements are all `<table>` elements?

\<table\>\<head\>\<tfoot\>

\<table\>\<tr\>\<tt\>

## Question 12:

Inline elements are normally displayed without starting a new line.

✔ True                                                                                                          Your answer

   False

## Question 13:

How can you make a numbered list?

✔ \<ol\>                                                                                                        Your answer

   \<list\>

   \<dl\>

   \<ul\>

## Question 14:

How can you make a bulleted list?

✔ \<ul\>                                                                                                         Your answer

   \<dl\>

   \<list\>

   \<ol\>

## Question 15:

What is the correct HTML for making a checkbox?

✔ \<input type="checkbox"\>                                                                                      Your answer

   \<check\>

   \<input type="check"\>

   \<checkbox\>

## Question 16:

What is the correct HTML for making a text input field?

✔ \<input type="text"\>                                                                                          Your answer

   \<textinput type="text"\>

   \<input type="textfield"\>

   \<textfield\>

✔ <select>    Your answer

  <list>

  <input type="list">

  <input type="dropdown">

---

## Question 18:

✔ Event attributes                                                                          Your answer

HTML elements

Style attributes

## Question 33:

Graphics defined by SVG is in which format?

✔ XML                                                                                        Your answer

CSS

HTML

## Question 34:

The HTML &lt;canvas&gt; element is used to:

✔ draw graphics                                                                            Your answer

create draggable elements

display database records

manipulate data in MySQL

## Question 35:

In HTML, which attribute is used to specify that an input field must be filled out?

✔ required                                                                                   Your answer

validate

## Question 36:

Which input type defines a slider control?

✔ **range**                                                                    Your answer

search

controls

slider

## Question 37:

Which HTML element is used to display a scalar measurement within a range?

✘ `<measure>`                                                                  Your answer

`<range>`

`<meter>`                                                                      Correct answer

`<gauge>`

## Question 38:

Which HTML element defines navigation links?

✔ `<nav>`                                                                       Your answer

`<navigation>`

`<navigate>`

## Question 39:

In HTML, what does the `<aside>` element define?

✔ Content aside from the page content                                          Your answer

## 100% Correct:

## Question 1:

What does CSS stand for?

✔ Cascading Style Sheets                                                          Your answer

   Creative Style Sheets

   Colorful Style Sheets

   Computer Style Sheets

## Question 2:

What is the correct HTML for referring to an external style sheet?

✔ <link rel="stylesheet" type="text/css" href="mystyle.css">                       Your answer
   <style src="mystyle.css">

   <stylesheet>mystyle.css</stylesheet>

## Question 3:

Where in an HTML document is the correct place to refer to an external style sheet?

✔ In the <head> section                                                          Your answer

   At the end of the document

   In the <body> section

## Question 4:

Which HTML tag is used to define an internal style sheet?

✔ <style>                                                                        Your answer

   <css>

   <script>

## Question 5:

Which HTML attribute is used to define inline styles?

✔ style                                                                          Your answer

   font

## Question 6:

Which is the correct CSS syntax?

✔ body {color: black;}                                                          Your answer

{body;color:black;}

{body:color=black;}

body:color=black;

## Question 7:

How do you insert a comment in a CSS file?

✔ /* this is a comment */                                                       Your answer

' this is a comment

// this is a comment

// this is a comment //

## Question 8:

Which property is used to change the background color?

✔ background-color                                                              Your answer

color

bgcolor

## Question 9:

How do you add a background color for all <h1> elements?

✔ h1 {background-color:#FFFFFF;}                                                Your answer

h1.all {background-color:#FFFFFF;}

all.h1 {background-color:#FFFFFF;}

## Question 10:

Which CSS property is used to change the text color of an element?

✔ color                                                                         Your answer

fgcolor

text-color

## Question 11:

Which CSS property controls the text size?

font-style

text-style

---

## Question 12:

What is the correct CSS syntax for making all the <p> elements bold?

✔ p {font-weight:bold;}                                                                     Your answer

   <p style="text-size:bold;">

   p {text-size:bold;}

   <p style="font-size:bold;">

---

## Question 13:

How do you display hyperlinks without an underline?

✔ a {text-decoration:none;}                                                                 Your answer

✔ text-transform:capitalize                                                                 Your answer

   transform:capitalize

   text-style:capitalize

   You can't do that with CSS

---

## Question 15:

Which property is used to change the font of an element?

✔ font-family                                                                               Your answer

   font-weight

   font-style

---

## Question 16:

How do you make the text bold?

✔ font-weight:bold;                                                                         Your answer

   font:bold;

   style:bold;

The top border = 10 pixels
The bottom border = 5 pixels
The left border = 20 pixels
The right border = 1pixel?

✔ border-width:10px 1px 5px 20px;                                                                    Your answer

  border-width:10px 20px 5px 1px;

  border-width:5px 20px 10px 1px;

  border-width:10px 5px 20px 1px;

---

## Question 18:

Which property is used to change the left margin of an element?

✔ margin-left                                                                                        Your answer

  indent

  padding-left

---

## Question 19:

When using the padding property; are you allowed to use negative values?

✔ No                                                                                                 Your answer

  Yes

---

## Question 20:

How do you make a list that lists its items with squares?

✔ list-style-type: square;                                                                           Your answer

  list: square;

  list-type: square;

---

## Question 21:

How do you select an element with id 'demo'?

✔ #demo                                                                                              Your answer

  .demo

  demo

  *demo

---

## Question 22:

How do you select elements with class name 'test'?

✔ .test                                                                                              Your answer

  test

## Question 23:

How do you select all p elements inside a div element?

✅ div p                                                                                     Your answer

div + p

div.p

## Question 24:

How do you group selectors?

✅ Separate each selector with a comma                                                       Your answer

Separate each selector with a space

Separate each selector with a plus sign

## Question 25:

What is the default value of the position property?

✅ static                                                                                    Your answer
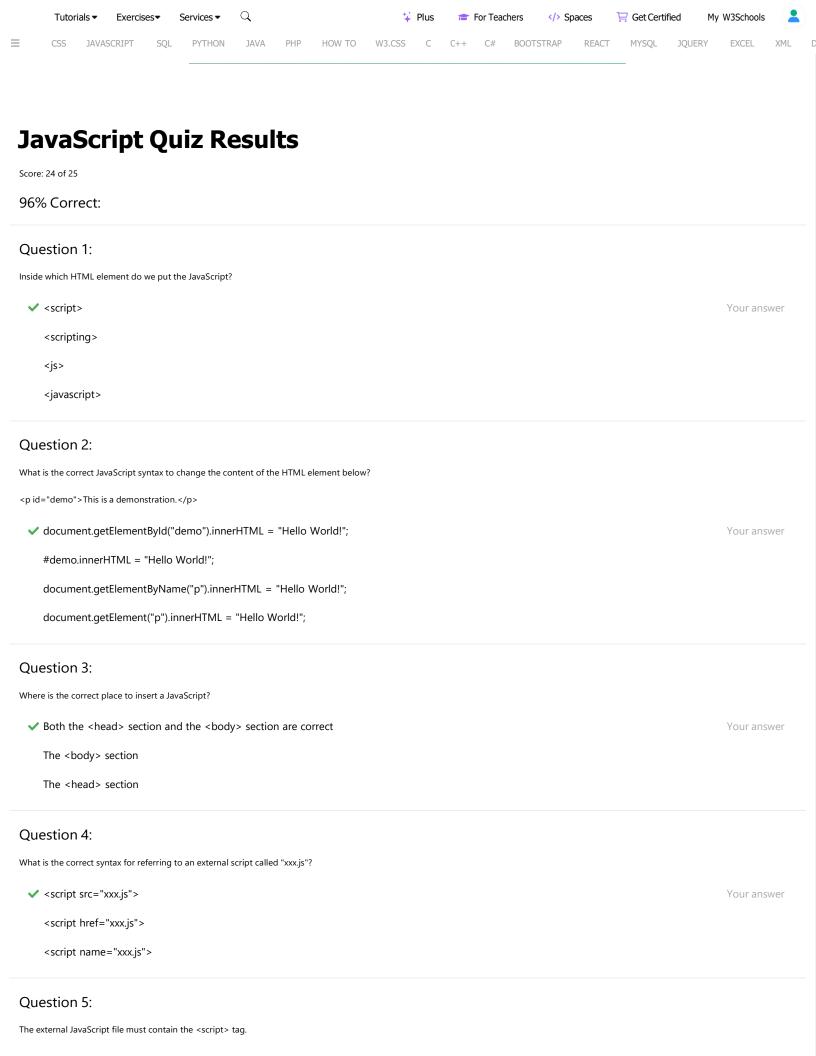

absolute

# JavaScript Quiz Results

Score: 24 of 25

## 96% Correct:

## Question 1:

Inside which HTML element do we put the JavaScript?

✔ <script>                                                                              Your answer

<scripting>

<js>

<javascript>

## Question 2:

What is the correct JavaScript syntax to change the content of the HTML element below?

<p id="demo">This is a demonstration.</p>

✔ document.getElementById("demo").innerHTML = "Hello World!";                            Your answer

#demo.innerHTML = "Hello World!";

document.getElementByName("p").innerHTML = "Hello World!";

document.getElement("p").innerHTML = "Hello World!";

## Question 3:

Where is the correct place to insert a JavaScript?

✔ Both the <head> section and the <body> section are correct                            Your answer

The <body> section

The <head> section

## Question 4:

What is the correct syntax for referring to an external script called "xxx.js"?

✔ <script src="xxx.js">                                                                 Your answer

<script href="xxx.js">

<script name="xxx.js">

## Question 5:

The external JavaScript file must contain the <script> tag.

## Question 6:

How do you write "Hello World" in an alert box?

✔ alert("Hello World");                                                          Your answer

   msg("Hello World");

   alertBox("Hello World");

   msgBox("Hello World");

## Question 7:

How do you create a function in JavaScript?

✔ function myFunction()                                                          Your answer

   function = myFunction()

   function:myFunction()

## Question 8:

How do you call a function named "myFunction"?

✔ myFunction()                                                                   Your answer

   call myFunction()

   call function myFunction()

## Question 9:

How to write an IF statement in JavaScript?

✔ if (i == 5)                                                                    Your answer

   if i = 5 then

   if i = 5

   if i == 5 then

## Question 10:

How to write an IF statement for executing some code if "i" is NOT equal to 5?

✔ if (i != 5)                                                                    Your answer

   if i =! 5 then

   if i <> 5

   if (i <> 5)

## Question 11:

How does a WHILE loop start?

while (i <= 10; i++)

---

## Question 12:

How does a FOR loop start?

✔ for (i = 0; i <= 5; i++)                                                        Your answer

for i = 1 to 5

for (i <= 5; i++)

for (i = 0; i <= 5)

---

## Question 13:

How can you add a comment in a JavaScript?

✔ //This is a comment                                                            Your answer

<!--This is a comment-->

'This is a comment

---

## Question 14:

How to insert a comment that has more than one line?

✔ /*This comment has
more than one line*/                                                             Your answer

//This comment has
more than one line//

<!--This comment has
more than one line-->

---

## Question 15:

What is the correct way to write a JavaScript array?

✔ var colors = ["red", "green", "blue"]                                          Your answer

var colors = (1:"red", 2:"green", 3:"blue")

var colors = "red", "green", "blue"

var colors = 1 = ("red"), 2 = ("green"), 3 = ("blue")

---

## Question 16:

How do you round the number 7.25, to the nearest integer?

✔ Math.round(7.25)                                                               Your answer

rnd(7.25)

Math.rnd(7.25)

# Question 17:

How do you find the number with the highest value of x and y?

✔ Math.max(x, y)                                                                    Your answer

Math.ceil(x, y)

ceil(x, y)

top(x, y)

# Question 18:

What is the correct JavaScript syntax for opening a new window called "w2" ?

✔ w2 = window.open("http://www.w3schools.com");                                     Your answer

w2 = window.new("http://www.w3schools.com");

# Question 19:

JavaScript is the same as Java.

✔ False                                                                             Your answer

True

# Question 20:

How can you detect the client's browser name?

✔ navigator.appName                                                                 Your answer

browser.name

client.navName

# Question 21:

Which event occurs when the user clicks on an HTML element?

✔ onclick                                                                           Your answer

onmouseclick

onchange

onmouseover

# Question 22:

How do you declare a JavaScript variable?

✔ var carName;                                                                      Your answer

v carName;

variable carName;

✔ =                                                                                                Your answer

-

*

x

## Question 24:

What will the following code return: Boolean(10 > 9)

✔ true                                                                                             Your answer

false

NaN

## Question 25:

Is JavaScript case-sensitive?

✔ Yes                                                                                              Your answer

No
